14th Winter School on Longitudinal Social Network Analysis with RSiena

Wednesday: Mixed topics

c.e.g.steglich@rug.nl

Today's topics (& votes received)

- ① moderation: working with interaction effects (a.e.) ✓ done
- ② absent data: missingness and composition change (12) ✓ done
- ③ differences between creation and maintenance of ties (9) ✓ done on Tuesday*
- ④ multi-group data (9) ✓ done
- ⑤ models for diffusion of innovations on networks (7) ✓ done
- ⑥ affiliation networks (two-mode / bipartite) (7) not done, script provided
- ⑦ networks with ordered values (e.g., signed) networks (6) – " –
- ⑧ undirected networks (5) not done, script provided on Monday
- ⑨ multiplex networks & behaviour (more than 2 dimensions) (5) not done**

* This topic was addressed as part of the network-network co-evolution script.

** This is a 'straightforward' combination of Tuesday's network-behavior and network-network topics.
